Lena Maude is known for her quirky presence that is both extremely playful yet dead serious. She crafts music that shimmers between indie folk and ethereal experimental pop with fingerstyle guitar, wide-ranging vocals, looping textures, and any object makes a sound. Her deep, booky lyrics blend nature, myth, and the tender condition of being alive.

Toting a large repository of unheard songs, Lena hit the road during winter of 2024-25 on the Change Everything You Know personal tour. She shed beliefs and belongings to make way for a happier way of being. The end result: full time Music.

With roots in the Michigan DIY scenes, Lena is now based in Colorado's Western Slope working on her next releases including a folk album titled Tender and her pop single Same Galaxy.
